PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building **fast, high-performance and scalable web apps** for SaaS and e-commerce, strongest on the frontend with React.js and Next.js and comfortable on the backend with Node.js, Express and MongoDB. At Deutics Global (Camzify), I owned **20+ production React components**, integrated **15+ REST APIs** with RTK Query and cut unnecessary re-renders by **about 40%**. I ship full-stack products end to end, including an embeddable multi-tenant **AI customer support chatbot** (Next.js, Gemini) and a MERN e-commerce store with Stripe payments and an **AI shopping assistant**. I use **AI-assisted development** to build faster while keeping code quality, security and performance in check.

CORE TECHNICAL SKILLS

Frontend:	React.js, Next.js (App Router, SSR/SSG), JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Web Design
Backend & Databases:	Node.js, Express.js, MongoDB, MongoDB Atlas, Mongoose, RESTful API Design, CRUD Operations
State & Data:	Redux Toolkit, RTK Query, TanStack Query, Context API, Caching, Pagination, Filtering and Search, Loading, Empty and Error States
Performance:	Memoization, Lazy Loading, Code Splitting, Virtualization, Debouncing and Throttling, Skeleton Loading, Custom Hooks
AI & Integrations:	AI-Assisted Development, AI Chatbot and Recommendation Features, Google Gemini API, OpenRouter, Stripe, Resend API, EmailJS, Recharts
Auth & Security:	JWT Authentication, bcrypt, Protected Routes, Role-Based Access Control (RBAC), Multi-Organization Auth
UI & Styling:	Tailwind CSS, Material UI, Styled Components, Bootstrap, Figma-to-Code
Tools:	Git, GitHub, Vercel, Postman, VS Code, Figma

PROFESSIONAL EXPERIENCE

Backend Developer (MERN Stack), Freelance
Sep 2026 – Present

Self-employed | Remote

- Built the backend for a travel-planning platform from scratch with Node.js, Express and MongoDB Atlas, and agreed on REST API contracts with the frontend developer.
- Set up JWT authentication (register, login, protected /auth/me, logout) with bcrypt password hashing.
- Designed Mongoose schemas for User, Trip, Itinerary, Destination and Activity from the product requirements.
- Moved the frontend's static destination data into MongoDB with a custom seed script, shipped the Destinations API and deployed the backend on Vercel.
- Currently building role-based access control (Traveler, Seller, Admin), full Trip CRUD and itinerary management APIs.

Junior MERN Stack Developer (Contract)
May 2026 – Jun 2026

Sprouto Group | Lahore (On-site)

- Built transactional email with the Resend API on the Node.js/Express backend and connected it end to end with the React.js frontend.
- Tightened the protected route setup in Node.js so unauthorized users are properly blocked.
- Reduced bundle size with code splitting and made components more reusable, so the UI is faster and easier to maintain.
- Took part in code reviews.

Full Stack Developer (Freelance)
Nov 2025 – Apr 2026

Self-employed | Remote

- Built and shipped an AI customer support chatbot and a MERN expense tracker on my own, both live on Vercel (details under Projects).
- Worked with Next.js App Router, SSR/SSG, TypeScript, JWT flows and third-party multi-organization auth.

Associate Frontend Developer
Oct 2024 – Oct 2025

Deutics Global (Camzify) | Lahore (On-site)

- Owned **20+ React components** that are still live in production. This was the biggest part of my role.
- Profiled the app, found components re-rendering unnecessarily and fixed them with memoization and better hook patterns, cutting unnecessary re-renders by **about 40%**.

- Integrated **15+ REST APIs** with RTK Query and TanStack Query, adding caching, skeleton loading, empty and error states, filtering, search and pagination for large datasets.
- Delivered three role-based interfaces (Admin, Sub-Admin, User) from Figma designs for an AI-powered surveillance platform, including a dashboard with real-time notifications and heat-map visualizations.
- Handled Figma-to-code end to end, matching spacing, colors and design tokens, and worked with the backend and product teams through sprint planning and code reviews.

React.js Intern, then Development Trainee May 2024 – Oct 2024

Deutics Global (Camzify) | Lahore (On-site)

- Worked on live, client-facing features from the first week, building dynamic features and integrating real APIs.
- Learned Redux Toolkit and RTK Query on real tasks, was kept on after the internship and promoted to Associate within 5 months.

Junior React.js Developer (Contract) Jan 2024 – Mar 2024

ZNZ Technologies | Lahore (On-site)

- Built reusable React.js components for an e-learning platform with gig creation, likes, comments and real-time chat.
- Turned Figma designs into responsive React interfaces, managed component state and integrated REST APIs for dynamic data.
- Took part in regular code reviews.

React Developer Feb 2022 – Oct 2022

Vvork Cloud Technologies | Lahore

- Built frontend features with React.js and Bootstrap and learned how production codebases are structured.

PROJECTS

AI Customer Support Chatbot (Multi-Tenant SaaS)

Next.js App Router, TypeScript, Tailwind CSS, MongoDB, Google Gemini

Live: ai-customer-support-b4dw.vercel.app

- Built an embeddable chatbot that any website can add with a single script tag, similar to Intercom and Tidio.
- Multi-tenant SaaS with multi-organization login and user management.
- Answers come from the Google Gemini API using each connected application's own information, and chat history is stored in MongoDB.

MERN E-Commerce Store with AI Shopping Assistant

React, Node.js, Express, MongoDB, Stripe, Redis (Upstash), Cloudinary, Tailwind CSS

Live: mern-ecommerce-store-w2lo.vercel.app

- JWT authentication, Stripe payments with webhooks, Cloudinary image uploads and an admin dashboard for products, users and orders.
- AI shopping assistant on the OpenRouter API that recommends products from the MongoDB catalog and falls back to another model automatically if one fails.
- Search, category filters, featured products and cart, with Redis (Upstash) for sessions.

Expense Tracker (MERN Stack)

React, Node.js, Express, MongoDB, Redux Toolkit, JWT, Recharts, Tailwind CSS

Live: sameerjohn1-expense-tracker-mern.vercel.app

- JWT authentication, protected routes, REST APIs and full CRUD on income and expense transactions.
- Analytics dashboard built with Recharts, with application state managed in Redux Toolkit.

Personal Portfolio

Next.js 16 (App Router), TypeScript, Tailwind CSS, Framer Motion, GSAP, Lenis, EmailJS

Live: sameer-john-portfolio.vercel.app

- Layered animation system (Framer Motion, GSAP, Lenis) kept performant, with a glassmorphism UI and a dark/light theme built on design tokens.
- SEO metadata and Open Graph tags, responsive layouts and an EmailJS contact form with error handling.

EDUCATION, CERTIFICATION AND LANGUAGES

- MERN Stack Developer Certificate, Vvork Cloud Technologies, Lahore (2022)
- Intermediate (FSc Pre-Engineering), Superior College, Lahore
- English (Professional), Urdu (Native)
